

MINTEX[®]

BRAKING WITH TRADITION

CONDITIONING **BEDDING IN** NEW MINTEX BRAKE PADS.

To optimise the braking performance of your new Mintex brake pads you must allow for a “bedding in” process as the new Mintex brake pads have to condition themselves to the brake discs on your vehicle. Generally by normal driving the Mintex brake pads will require approximately 200 miles to become fully conditioned. During this period we recommend that you AVOID hard or aggressive braking.

Caution: Excessive braking can cause the friction material to overheat too quickly resulting in the brake pad surface to glaze over and affect the overall braking performance during this process.
